The Value of Occupational Therapy
Overview

• College of Occupational Therapists occupation-centred practice position statement
• College of Occupational Therapists occupation-centred practice briefing:
  – Occupation-centred
  – Occupation-focused
  – Occupation-based
• College of Occupational Therapists Improving lives saving money campaign
1. What is the unique perspective of occupational therapy?

2. How do you describe your role to:
   – Adults?
   – Children?
   – Other professionals?

3. How does ‘occupation’ feature within your explanation?
Example explanation

- Occupational therapy improves health and wellbeing through *participation in occupation*.

- Occupational therapy enables people to participate in daily life to improve their health and wellbeing. Daily life is made up of many ‘*occupations*’ such as getting ready to go out, cooking a meal or working. An occupational therapist will help people who may need support or advice if they are not able to do their occupations due to illness, disability, circumstances or as a result of changes in their lives as they get older.
COT position statement

• “Occupation should be considered a basic need and human right, like eating, drinking and breathing (Dunton 1919). There is a renewed understanding of how engagement in occupation is therapy and fundamental to health and wellbeing (Wilcock 2006).”

• “The focus of the practitioner in any setting, with any service user group is to maximise occupational performance and participation (World Federation of Occupational Therapists 2012).”

COT briefing - terminology

• **Occupation-centred**
  describes an approach where occupation is at the core. It is made up of occupation-focused and occupation-based practice.

- **Occupation-focused**
  describes practice where information about the person, environment and occupation relates closely with occupational performance.

- **Occupation-based**
  describes practice where the ‘doing’ of occupation is the main ingredient in assessment, intervention and measure of outcomes.

• Available at: [https://www.cot.co.uk/docs/briefings/professional-practice](https://www.cot.co.uk/docs/briefings/professional-practice) (you will need to be logged in)
Occupational therapy improves health & wellbeing through participation in occupation.
College of Occupational Therapists’ Campaign Programme

1. Keeping people out of hospital
2. Reducing pressure on primary care
3. Addressing over reliance on social care
• What would be your service’s infographic?
• What data do you need to evidence this?

Occupational therapists in care homes can reduce falls by 67% (Source: Advancing Healthcare Awards 2014)

Occupational therapists in reablement services help 63% of people back to independence (Source: Urgent Care: The Value of Occupational Therapy, 2018)

Occupational therapists working with paramedics keep more than 75% of callers at home (Source: Urgent Care: The Value of Occupational Therapy, 2015)
Information: demonstrates impact

- Are you clear about the data that is collected from occupational therapy records in your organisation?
- Do you know what information can be extracted and reported which could assist you in demonstrating the effectiveness of your interventions?
- What are your organisation’s plans for electronic records?
- Do you know who you need to talk to in your local IM&T team to find out more details and if there are any working groups you can get involved in?
How do I do this?

- Visit our website to download the impact data form
- Use the example template and guidance notes provided
- Attend a COT Roadshow for help calculating cost savings
- Speak to your manager about getting involved in the campaign
